**Do you have cracks in your foundation, walls and swimming pool?
Earth movement is common when an oilfield operator uses water / liquid injection
oil recovery methods like PXP is using in the Inglewood / Baldwin Hills Oilfield.**

Here's a handy guide for checking for structural changes in your home.

LOCATION	Date	Photo	Date	Photo	Date	Photo	Date	Photo	Description or Notes
Foundation									
Living Room									
Bedroom 1									
Bedroom 2									
Hallway 1									
Bathroom 1									
Driveway									
Pool									
Garage									

Inspection Tips. 1) Window / door frames - cracks and gaps at corners. 2) Driveway cracks 3) Foundation movement and exterior cracking. 4) Increased hillside erosion. 5) Water mains & fire hydrants.

Inspect monthly, photograph and date damages that have occurred at your residence. Also record the date and time of any interior frame noise or creaking.

Cracks and ground movement damage is likely to continue with planned expansion of PXP oil production. CEQA lawsuits have been filed. Property damage lawsuits are likely to follow.

Please share your contact information and story with us.

Report Damage to Gary Gless. Call 310-227-3201 or email: 800ccsc@gmail.com
